

What does BluMo®Energy do?

- Improves the balance of the human body.
- Improves the well-being of people.
- Improves the climate balance between the human body and environment.

How does BluMo®Energy work?

- Small, finely milled particles of minerals have harmonizing vibrations to the body's energy system to improve the sense of balance.
- These minerals as seen in nature improve and influence the climate balance through the insulation effect.

How is BluMo®Energy applied?

- Coating, printing, spray application.
- Dry deposit 30-50 g/m² on the back side of the fabric.

The completely new product BluMo®Energy has demonstrated its effects in trials on many volunteers with great success.

Test your stability with BluMo®Energy.

1.

The test person stands with legs apart to form a stable base with both hands cupped together behind their back at waist height. 2nd person pushes down with their full weight on the cupped hands.

Without BluMo®Energy the test person falls backwards and loses his balance.

With BluMo®Energy the test person does not move!

2.

The test person stands on one leg, both arms stretched out to the side. 2nd person pushes vertically on the centre of an arm with his full weight.

Without BluMo®Energy the test person falls to one side and loses his balance.

With BluMo®Energy the test person does not move!

3.

The test person stands with legs together, arms by the side of the body, hands angled inwards. 2nd person presses vertically on the angled hand with his full weight.

Without BluMo®Energy the person falls to one side and loses his balance.

With BluMo®Energy the test person does not move!
